Statement of Purpose:

Being a shadow member of this committee helped me understand how to work in a large team, how to delegate work and accommodate different opinions. It taught me how to do quality research, work under deadlines and improved my soft skills.

I want to join the Placement Committee as a core member because it is a role encompassing diverse responsibilities which not only will give me ample opportunities to learn but also challenge me every day which will boost my self-confidence. It will help me learn how to be resilient and enhance my decision-making skills. The amount of multi-tasking and negotiation skills this role requires will prepare me for the future and make me competent enough for any type of industry that I will be a part of.

It is a huge responsibility but there is a lot to gain and I want to work as a team player to be able to give justice to it. Knowing that it is a selfless job, I am ready to be a part of it and sincerely work for my batch, my junior batch and the senior batch under the guidance of the current core team.
