Statement of Purpose:

As an individual with experience in end to end sales across different industries, I am a person Of virtue, patience and commitment. Since my childhood, I have been involved with many generations Of Placecommers across different B-Schools amongst my family friends, and have been amazed by the zeal they carry to help an entire batch. I have an good understanding Of my personal network, companies, booming industries and knowledge about how different companies conduct different processes and how I can give in my efforts to bring them to the campus. Equipped with good negotiation and people understanding skills, I would be an asset to the team and for the university, where my sole focus would be in developing people as a batch and get the average placement number higher. Our competition is amongst other B-Schools and our focus would be on getting higher in the ranks. Working with the Placement Committee as a shadow has developed me to an extent where I can work with sheer focus and deliver in time. I have a good understanding about the dynamics Of the Batch Of 2020-22, and would be able to help them get placed in reputed compan•es. My parents have taught me not to see my name as my identity, but rather my qualities being a representative Of my name. Of amidst millions Of Swapneel's, what I bring to the table is creativity, empathy, transparency, team spirit and a little craziness in imagination and pride in the person I am.
